OIL and GAS NEWS

Healdton Crude Up 10 Cents.
Healdton crude was advanced to 55c today. The following telegram was received by The Ardmoreite from the Magnolia Pipe Line company in Dallas: "Effective today, November 15, we have increased price of Healdton crude thirty gravity or better to fifty-five cents per barrel of forty-two gallons at the well."

This followed an advance at Cushing Saturday of ten cents and if the oils are kept at the ratio which they have been kept at for some time, Healdton is due another advance of ten cents tomorrow or next day.

J. E. Crosbie No. 12 in 5-4-3 has a rig up.

DuArde Oil company No. 11 in section 9-4-3 has a rig up.

Oklahoma Star company No. 2 in 10-4-3 is rigging up.

Coline Oil company in 6-4-3 is rigging up for its No. 3 Ferguson.

Paraffine Oil company No. 4 Cruce et al in section 5-4-3 is rigging up.

Lawrence Oil & Gas company No. 12 in section 9-4-3 is drilling at 900 feet.

Ardhoma No. 4 on the Apple-Franklin lease in section 9-4-3 is drilling at a depth of 750 feet.

GUARANTY STATE BANK

Ardmore, Oklahoma.

In conformity with a recent law, we will in the future discontinue the practice of allowing overdrafts. Our customers will confer a favor on us, if they will be careful and not write checks overdrawn their accounts.

Ardworth Company.

Ardworth Oil company No. 10 on the Ardworth farm in section 10-4-3 is drilling at 850 feet. No. 13 was finished at a total depth of 1,054 feet with a production of 100 barrels. No. 14 has reached the top of the sand at 895 feet. No. 15 is rigging up and No. 16 has a rig up.

McMan Has Gasser.

McMan Oil company on the Doris Coffey lease in section 15-4-3, offsetting Seavally Petroleum company No. 2 on the south, has reached a gas sand. The depth of the well is not known but is probably no more than 300 feet deep. Persons who passed the well yesterday said it was making a large volume of gas.

McMan-Corsicana Nos. 22 and 23 E. T. Richards in section 31-3-3 have rigs up; No. 25 in section 6-4-3 was completed at 1080 feet, with a production of 2,500 barrels; No. 28 in 31-3-3 was completed at 1,212 feet with 250 barrels; No. 29 in 6-4-3 was completed at a depth of 1,230 feet with 2,000 barrels' production; No. 30 in 6-4-3 is rigging up and No. 31 in section 31-3-3 is spudding.

Returned from China.

E. W. Morgan, who for a number of months had charge of the drilling operations for the Standard Oil company in China, is an Ardmore visitor. Since returning from China Mr. Morgan has spent some time at Wichita Falls and at Mineral Wells, and is now in the Healdton field with a view of remaining.

Wichita Falls Manager.

A. I. Brainard, manager for the Frick-Reid in the Wichita Falls district, is here visiting with the Healdton manager, G. D. Payne, and will remain here the balance of the week. The rush in the Healdton field has placed Mr. Payne where he appreciated the assistance which Mr. Brainard is giving him.

Gates Company.

Gates Oil company No. 1 Wesley in 3-4-3 was completed at a depth of 1,054 feet and has a production of 450 barrels. No. 10 has reached the top of the sand at 800 feet. No. 11 is drilling at 1,050 feet. No. 12 is at the top of the sand at 850 feet and No. 13 lost its rig in a fire caused from gas.

After Healdton Crude.

The Chantre Refining company is represented here by its president, C. A. Braley and its secretary and manager, L. L. Marcell. These gentlemen have visited the field and express the opinion that the production within forty days will go to 200,000 barrels. They came here for the purpose of making purchases of oil which they will ship in tank cars to their refinery.

Stockman's New Well.

Stockman's Oil company No. 2 in the southern part of section 15-4-3 has been completed and is good for 100 barrels or more, and is making some gas. The first sand of 30 feet thickness was found at a depth of 1,080 feet. The second sand, 35 feet thick, was found at 1,160 feet and the third sand was found at a depth of 1,200 feet. The total depth of the well is 1,240 feet, and it has approximately 100 feet of sand.

Oklahoma Star Company.

Oklahoma City, Nov. 13.—Oklahoma Star Oil company of Oklahoma City, has taken over an 80-acre tract of oil land in Okmulgee county from the Junior Oil and Gas company. The property has seven producing wells and several undrilled locations. The Oklahoma Star will proceed at once to drill out the remaining locations. The property includes a complete pumping plant, tankage and all other property belonging to the Junior company on this tract.

Healdton Crude in Demand.

The lowering of production in the Cushing field is beginning to make Healdton oil look mighty good. Some buyers were here last week and others are expected this week. They are negotiating for the purchase of oil to be shipped to refineries in tank cars. If any sales have been made, they have not been reported. Cushing crude has now reached the dollar mark, and that is another good reason why the demand here should become stronger.

A Busy Town.

A number of all-night restaurants are operated at Wirt, the town in the oil fields, and some of the boarding houses stay open all night. The morning tower on the drilling wells begins at midnight and a large number of men leave the boarding houses with their lunches at midnight, and the men on the afternoon tower, which begins at noon and ends at midnight, come in at that hour from their work. About fifty strings of tools are running and these give employment to a vast number of men.

Foot Ball Time

We have everything in FOOTBALL GOODS

Line up for the game, the season is short, but "busy." Come in and pick out your outfit.

CITY DRUG STORE

V. A. GRAVITT, Manager

The field has a bunch of toughs, and many holdups are reported.

Mr. Veal, who operates a boarding house in section 5 was called, out a few nights ago by persons who said they had a death message for a man named Jackson, who was supposed to stay with Mr. Veal. The boarding house keeper walked out to talk with the men and when he stepped on the outside he was covered with a gun, relieved of \$27 and marched down the road a short distance and turned loose.

Traffic is Heavy.

James Williams, who operates a motor car express between Ardmore and the oil fields, brought in fourteen passengers Saturday night, and there were others who wanted to come with him, but who could not find room in the bus. Mr. Williams devotes his time chiefly to the carrying of baggage and leaves the field every evening at 7:30 and reaches Ardmore for the night and the morning trains. The number of passengers and the amount of express which he handles is evidence that the fields are very busy.

The Hernstadt Well.

S. J. Hernstadt No. 3 in section 4-4-3 was drilling Sunday morning at a depth of 950 feet. Some producing sands have been found but they were unsatisfactory and the drill is being sent deeper. At the depth named it was in a lime formation. At a distance of 350 feet south of this well, Mr. Hernstadt has a good producer and the Corsicana Petroleum on the Mutual Benefit lease, a distance of 1,200 feet north has an excellent well and Mr. Hernstadt had a right to expect a better well than he got in the shallow sand.

The Texas-Oklahoma Syndicate in 26-5-4 in the Francis field in Pontotoc county is drilling at a depth of 900 feet. In the same field, near the center of section 34-5-7, the Corsicana Petroleum company has made a location and will be drilling there within a short time. One well has been completed. In this field, it is located in the northeast of the northeast of section 34-5-7 and is making a nice quantity of gas and about 25 barrels of oil. The entrance in this field of the Corsicana Petroleum company means that a thorough test will be made, and owners of property there should appreciate the fact that their community has oil attractions for such a company.

The Gypsy Well.

The estimate placed by the Gypsy company upon the gas production in its well on the Johnson and von Weise farm in section 28-2-3, ten miles north of Healdton, is eighteen million cubic feet. The gas sand was found at 1195 and the well was drilled to a total of 1845 feet. The company ordered the gas shut in and material has been sent to the well to be used in shutting it in and the gas will be conserved. The gas is dry and it may mean the absence of oil. Beyond the order to shut the well in and save the gas, no further order has come from the company's offices, and what will be done is not known.

Santa Fe Officials Here.

W. E. Hodges, vice-president of the Houston, Topeka & Santa Fe Railway company of Chicago, accompanied by his assistant, F. E. Connors, and W. D. Foley, auditor from Wichita, Kan., is in the city today. The Santa Fe officials are here to finally close the negotiations for the purchase of the Coline property and to take possession of the lease. Mr. Hodges paid the owners of the Coline company one million dollars for their Healdton stock. While no statements have been made it is believed that F. A. Redmond, who is at the head of the fuel oil department of the Santa Fe company, will take charge of the Healdton field property. Mr. Redmond has for several years had charge of the Santa Fe field and his ability as an oil man is unquestioned.

FORMER WATER BOY NOW CONTROLS STEEL PLANT STOCK

New York, Nov. 14.—Three hundred thousand shares of stock or thereabouts in the Cambria Steel company were bought Friday for approximately \$15,000,000 by J. Leonard Replegle of this city, who started his business career when 11 years old as a water boy at less than \$5 per week in the Cambria mills at Johnstown, Pa.

Mr. Replegle, who is 38 years old, bid against his old superior officer, Wm. H. Donner, president of the company, and won the stock after negotiations in Philadelphia which lasted virtually day and night for several days. The stock was sold by the Pennsylvania railroad which formerly owned a controlling interest in the Cambria company. The capitalization of the Cambria Steel company is authorized at \$50,000,000 but only \$15,000,000 (900,000 shares of a \$50 par value) were issued. Mr. Replegle resigned as vice-president of the Cambria company on March 1.

So far as is known Mr. Replegle now is the largest single stockholder. Whether a fight for control will develop is to be seen. The Cambria property consists of large steel mills and blast furnaces at Johnstown, Pa., and extensive iron ore holdings in Michigan. In addition the company operates the Cambria Steamship company and the Manufacturers' Water company at Johnstown.

What is to be done with the Cambria property under Mr. Replegle's management—if he succeeds in obtaining sufficient additional stock to give him control—is yet to be divulged. It is regarded as unlikely, however, that the mammoth plant will be put to work extensively on munition orders from the allies, an undertaking which Wall Street gossip has applied to several steel companies recently.

SERBIAN SOLDIERS

Ragged and Dirty, but Splendid Specimens of Manhood.

The Serbian soldiers are a splendid looking lot. They are ragged and dirty and tunic headed beyond description; but they are very tall and well built; their shoulders are square and their eyes are clear. They make me think of Fuzzy Wuzzy, who was a poor benighted "lathen but a fast class fightin' man." If their government could only afford to buy uniforms for them! I have heard of a large order of them coming from the United States, and I live in hopes that they will arrive and be moved into before I leave. Just now a marching regiment looks as if its keepers had forgotten to put its leg chains on.

In the first place the men have no music, and they shuffle disgracefully; then they are garbed in every kind of thing from the remains of faded old uniforms to tattered and misfit civilian clothes and unbelievably ragged and dirt-incrusted native peasant costumes. If they were decently trimmed up and uniformed, and properly drilled, in the dressy sense of drill, they would make one of the handsomest armies in the world. I have seen whole companies without a man in them under six feet tall; and, as every Serbian is a soldier, this is a sort of general commentary on the physical Serbian man.—Saturday Evening Post.

A tight feeling in the chest, accompanied by a short, dry cough, indicates an inflamed condition in the lungs. To relieve it, buy the dollar size BAL-LARD'S HOREHOUND SYRUP; you get with each bottle a free HER-RICK'S RED PEPPER POROUS PLASTER for the chest. The syrup relaxes the tightness and the plaster draws out the inflammation. It is an ideal combination for curing colds settled in the lungs. Sold by Bonar Drug Co.

DETAILS OF DOUBLE MURDER NEAR HUGO

Hugo, Okla., Nov. 14.—George Jones, Choctaw Indian, has confessed to the authorities that he formed a murder pact with Bill Fisher, son of Morris Fisher, aged Snake Indian, who with his wife was found dead near this city Thursday, according to a statement given out by the county attorney's office Sunday. Young Fisher killed his aged father and mother as planned, blowing the father's head off as he lay asleep and shooting his mother when she arose from the bed at the sound of the shot.

The Fishers were wealthy and the son is said to be the only heir to the aged couple. The Fisher allotments are said to be worth \$40,000.

Jones is credited with the statement that Fisher offered him \$300 to go with him to the home of the aged couple and help him kill them. Jones declares, the statement continues, that when they reached the house, he (Jones) backed out and refused to aid in the foul deed, but that Fisher went into the house and with a shotgun fired at the old man as the aged couple slept. As his mother jumped out of bed he fired the other barrel at her, killing her instantly, the statement says.

Jones, it is said, told the county at-

turny where the gun could be found. Search will be made in a creek nearby, where Jones says the weapon was thrown. Jones strongly declares he had nothing to do with the killing. Feeling here is running high over the Fisher double murder, but it is not thought there is any danger of mob violence.

FAMILY AVOIDS SERIOUS SICKNESS

By Being Constantly Supplied With Thedford's Black-Draught.

McDuff, Va.—"I suffered for several years," says Mrs. J. B. Whitaker, of this place, "with sick headache, and stomach trouble."

Ten years ago a friend told me to try Thedford's Black-Draught, which I did, and I found it to be the best family medicine for young and old.

I keep Black-Draught on hand all the time now, and when my children feel a little bad, they ask me for a dose, and it does them more good than any medicine they ever tried.

We never have a long spell of sickness in our family, since we commenced using Black-Draught.

Thedford's Black-Draught is purely vegetable, and has been found to regulate weak stomachs, aid digestion, relieve indigestion, colic, wind, nausea, headache, sick stomach, and similar symptoms.

It has been in constant use for more than 70 years, and has benefited more than a million people.

Your druggist sells and recommends Black-Draught. Price only 25c. Get a package to-day.
